## HIGH PRESSURE PUMPS FOR CHEMICAL APPLICATION

# PEROXIDE DOSING PUMPS FOR LDPE PLANTS (350 MPa).

## STAND-BY INTENSIFIERS

offer redundancy and improve the availability of the dosing pump. Switch-over can be effected directly at the pump or remotely controlled via the central control unit (DCS).

## PEROXIDE DOSING PUMPS

with intensifier in "single" and "stand-by" design, pressure range up to 350 MPa, flow rates up to 150 l/h, as well as high pressure tubing systems and injection nozzles for use in LDPE (Low Density Polyethylene) reactors.

Also available as PHASETEC® system – central hydraulic unit with phased intensifiers

## PRESSURE TESTING PUMPS AND SYSTEMS (550 MPa).

### PRESSURE TEST PUMPS

mobile type for construction site use and as stationary plants for valve testing units, flow rates up to 1 l/min at a max. operating pressure of 550 MPa.

### STATIONARY VALVE TESTING STATION

and complete pressure testing units for a max. operating pressure of up to 550 MPa.

## AUTOFRETTAGE SYSTEMS (1,200 MPa).

### ULTRA HIGH PRESSURE PUMPS

and components for autofrettage and pressure testing units with operating pressures of up to 1,200 MPa with a flow rate of up to 0.5 l/min.

### TOOLS AND COMPLETE SEALING SYSTEMS

for pressure testing and autofrettage at operating pressures of up to 1,200 MPa.
